

Duma SDV report

Sim time 7:15 · drive log 7:13 · FNM

1. Car state and operating conditions

Power state	CHARGING	Ambient temperature	23.0 °C
Gear	P	12 V battery	12.7 V
Drive mode	Normal	Contactors	main- closed, pre-charge open, main+ closed
State of charge	60 %	Charging	DC charging, target 80 %, 98.2 kW
Estimated range	299 km	Odometer	4.03 km
Pack voltage	582.8 V	VCU firmware	1.0.0
Pack current	-168.4 A	BMS firmware	1.0.0
Pack temperature	23.9 °C	MCU firmware	1.0.0
Motor temperature	30.2 °C	IC firmware	1.0.0
Inverter temperature	30.0 °C	TCU firmware	1.0.0

2. Fault and DTC history

Code	Module	ECU	Severity	Status	First seen	Last active
P0A7E	Traction battery	BMS	amber	stored	2:32	2:32

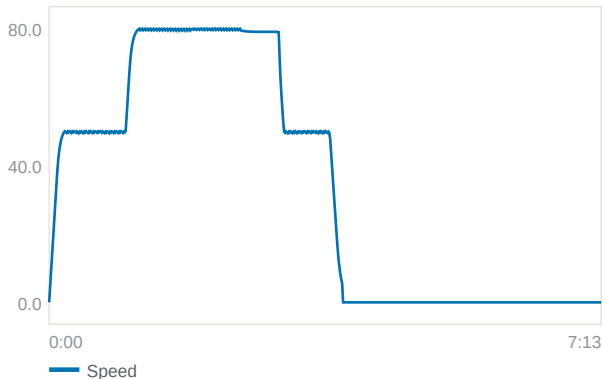

Dashboard warning: none. Drive restriction: None.

Restriction	Start	End	Duration
Reduced power	2:32	3:02	30 s

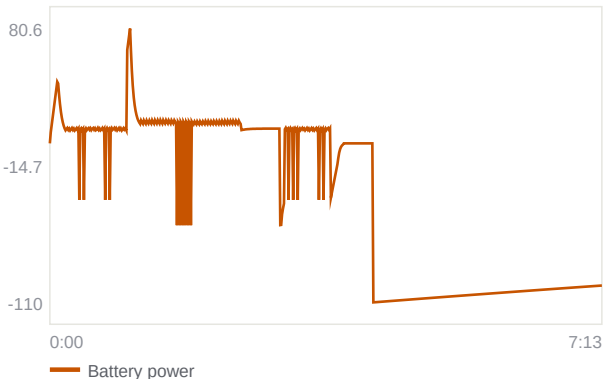

3. Trip telemetry

Distance	4.03 km	Energy recovered	0.23 kWh
Run time (drive log)	7.2 min	Consumption	152 Wh/km
Driving energy at the pack	0.61 kWh	Maximum speed	80 km/h
Net energy since start (incl. charging)	-4.58 kWh	Maximum battery power	80.6 kW

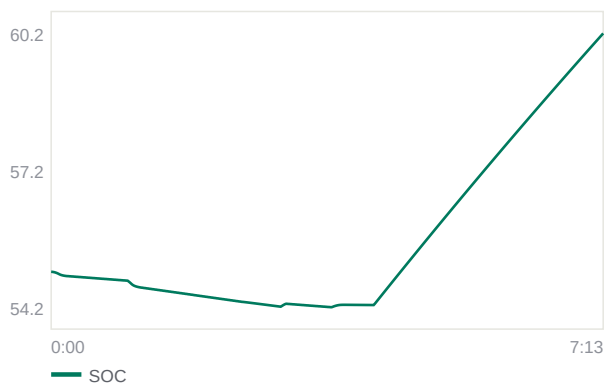

Speed (km/h)

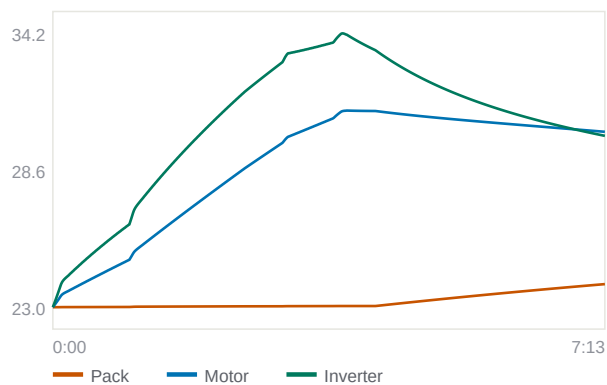

Battery power (kW)

State of charge (%)

Temperatures (°C)

4. AI summary

AI summary unavailable: no API key in the paper build.

5. Suggestions and tips

AI summary unavailable: no API key in the paper build.

From the car's rules

- 1 stored fault record(s): clear them in Diagnostics once the cause is serviced.
